

Hearing Aid Manufacturers

FIFTH PROMPTING – May 4, 2022

from *Each Ear, LLC*

My fellow Practitioners, we know that when the receivers are inserted deeply enough, patients enjoy:

- Optimal hearing and understanding
- Hearing aids that are more secure (purging fear of loss)
- Reduced feedback, and
- Hearing aids that are less noticeable (because wire closer to the head)

And, of course, you and the industry enjoy:

- Happier, more successful patients
- Reduced returns
- An enhanced reputation for RIC-style hearing aids, and
- An enhanced reputation for the hearing aid industry

The Entire Industry Benefits with *Gruv Button Technology*™! All Hearing Aid Users, Practitioners, Hearing Aid Manufacturers, Veterans, Caregivers; the entire hearing aid industry.

Hearing Aid Manufacturers, our patients should always come first, don't you agree?

Senior Management – You must know by now – that every day that goes by without *Gruv Button Technology*™ – is another day with unnecessary stress and frustration for your hearing aid users and caregivers – and another day fortifying a barrier to hearing aid adoption.

Senior Management – Respectfully, what are you waiting for? What?

Please see: "[Announcement #1 to Hearing Aid Manufacturers.](#)"
